DETAILED ACTION

Drawings

Page 3 (of 3) of the drawings, which includes figures 8 and 9, is missing.
 Applicant is required to furnish a drawing under 37 CFR 1.81. No new matter may be

introduced in the required drawing.

Double Patenting

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain <u>a</u> patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer <u>cannot</u> overcome a double patenting rejection based upon 35 U.S.C. 101.

- 3. Claims 1-4 and 7-18 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-16 of prior U.S. Patent No. 5,662,683. This is a double patenting rejection.
- 4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double

patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 5 and 6 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 5,662,683 in view of DeCaro (4,762,453). U.S. Patent No. 5, 662,683 discloses the invention substantially as claimed, but does not disclose a modular head with an internal hex that cooperates with the open helical structure of the anchor. DeCaro teaches, in figure 9, a modular head (12) with an internal hex (19) that cooperates with an open helical structure (40). It would have been obvious to one having ordinary skill in the art at the time the invention was made, to include a modular head as taught by DeCaro in the anchor of U.S. Patent No. 5,662,683. Such an attachment head would provide a means to distribute pressure on tissue by providing a wider surface area of contact. An internal hex in the head would provide a convenient means for installing the anchor with a readily available allen wrench.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Limpert (2,033,039), Miles et al. (2,391,792), and Schmieding (5,626,613) teach helical anchors.
